

Herbal Moth Repellent Recipe

Developed by the NESU Herbal Study Group

Just a quick note about Herbal Moth Repellent, it works best when the clothes and woolens that are being stored are clean and free of any food or grease stains. Unfortunately, if you already have a moth problem this won't get rid of the pests. The herbal moth repellent is only a deterrent.

Ingredients:

2 Cups Santolina
3 Cups Cedarwood
3 Cups Wormwood
1 Cup Chamomile
1 Cup Lavender
1 Cup Rosemary
1 Cup Lemon Thyme
½ Cup Bay leaves crushed
½ Cup Rue
½ Cup Meadowsweet
1 Cup Tansy
1 Cup Pennyroyal (Lemon balm or mint can be substituted.)
½ Cup Feverfew
½ Cup Sweet Woodruff
6 oz. orrisroot or oak moss (we used orrisroot)
40 drops of essential oil. We used Atlas Cedarwood EO

Combine essential oil with orrisroot. Mix until orrisroot is coated with the essential oils.
Combine all ingredients in bucket. Cover and store for 6 weeks, stirring mixture weekly.
